

Gutridge appointed at BRiNK's UK plant

BRiNK Towing Systems South Africa managing director, Mark Gutridge, has been appointed in a similar role at BRiNK Towing Systems United Kingdom. The UK plant is the sole supplier of Land Rover towbars and Gutridge will be tasked with transforming the plant into a manufacturing facility as it's currently assembling imported kits from Holland.

A qualified mechanical engineer, Gutridge started at the company's SA plant 10 years ago and had been involved in its growth over the years as it became one of the leading manufacturers of towbars, exclusively supplying companies like Ford and Toyota.
