

See: BMW's new X1 is now available in South Africa

South Africans can now buy the new BMW X1. With its appearance and functional versatility, it offers a sense of freedom and independence during everyday driving and longer journeys. The X1 sDrive18i and sDrive18d will be followed in early 2023 by the all-electric BMW iX1 xDrive30e.

All model variants come as standard with 18-inch light-alloy wheels as fitted on xLine and M Sport cars, although these models are also available with 19-inch and - in a first for the BMW X1 - 20-inch wheels.
