

Electric Jaguar I-Pace concept

Jaguar has unveiled its first electric vehicle (EV) concept, the I-PACE. The five-seater SUV features electric motors at the front and rear axels which together deliver 400PS and 700Nm of torque. [Read more here.](#)

The production version will be revealed in late 2017 and will hit the road in 2018, and is said to be headed for South Africa in spring 2018.
