

DSE 2017 promises newest hardware, software, distribution tech

ATLANTA: Digital Signage Expo (DSE), an international trade show and educational conference dedicated to digital displays, interactive technology and digital communications networks, will present the newest technology in the industry from 29-30 March 2017 at the Las Vegas Convention Center.

DSE's new product showcase will feature dozens of new products that attendees will have the opportunity to see first-hand with a variety of software, hardware and distribution technologies, such as an analog/digital streaming encoder and extenders for controlling uncompressed 4K displays; a fan-less option that will support high-end and heavy media applications, another that will operate in 14 to 140 degrees Fahrenheit ambient temperature; hardware that is enterprise-ready and all-in-one; new software options that support ultra HD 4K, provide a wide variety of signage templates and a full content library; as well as mounts that provide shape flexibility and no assembly required.

DSE's 2017 new product showcase will include:

- Adaptive Technologies Group - Loc-n-Load
- AOPEN - AOPEN Chromebase Mini
- Baanto International - Modular Touch System
- Bitvu - Inferno Streaming Media Encoder
- Chief - Freestyle Rotation Adaptor
- Enplug - DisplayOS: Partners' Edition
- Hall Research - HHD264 HDMI over LAN Sender
- KANEXPRO - 4K HDBaseT® Repeater with 1x2 HDMI
- Logic Supply - ML100G-50 Industrial Intel Skylake Fanless NUC
- Premier Mounts - UMB Menu Board Mount
- Premio, Inc. - VIO-W221C Panel PC
- Tighrope Media Systems - Carousel Digital Signage Software V7.0
- Ventus - LCM100 "Mini"
- Vivitek - NovoDS4K
- Wovenmedia - WovenContent

Registration to see all of the newest technology in person or attend any of the DSE 2017 educational conference seminars is available online at www.dse2017.com.
